

Case Study

Bamboo VanLife

Industry:
Adventure Van

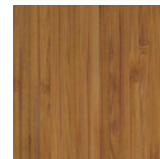

Location:
Anywhere, North America

Designer/Builder:
KUL Van Outfitters

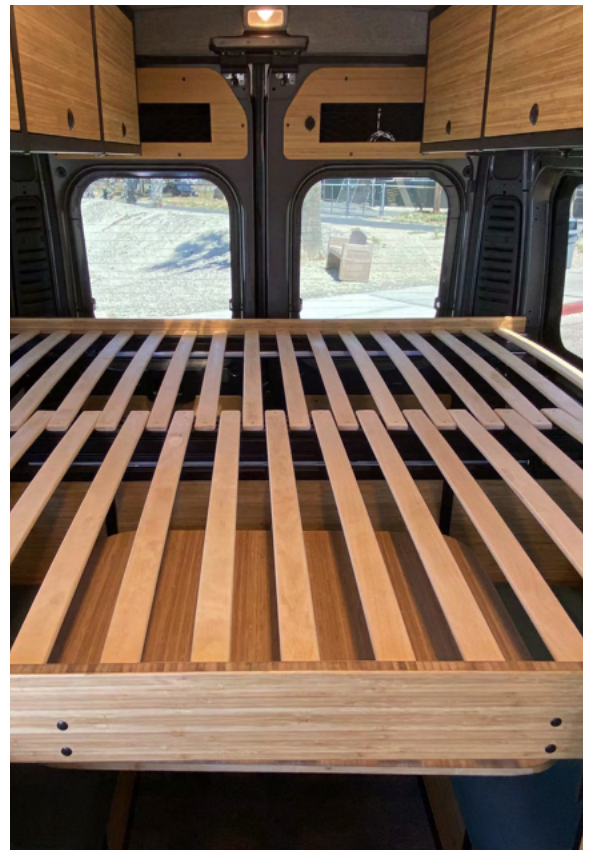

The team at KUL Vans has been working with Plyboo bamboo panels for a few years now, and asked why bamboo has been so popular with their client base, they responded that, "The customer is just blown away when they see a well-executed bamboo interior in a van. I have provided other material options in the past, but the customer consistently selects bamboo as their preference." Further adding, "There is generally an immediate, very positive reaction to a customer seeing Plyboo in a van interior." As to workability of the Plyboo material, KUL expressed that they liked the consistency, the smooth sand and blemish free surface of the product. "I absolutely love the ease of using Plyboo throughout the fabrication and finishing process."

Materials Used:

Edge Grain
Amber Plywood

Physical / Mechanical Properties - Edge Grain Amber Plywood

Dimensions	48" x 96" in thicknesses of .25", .50", .75", 1" + 1.5"
Construction	3-ply assembly, perpendicular core, 100% bamboo
Moisture Content	6-9% average
Fire Rating	Class C
Finish	Unfinished
Organic Emissions	Meets or surpasses ULEF (ultra low emitting formaldehyde) standards under CARB II
